

**Registration No :** 25BAC10022  
**Name of Student :** AARCHIE SHRIVAASTAVA  
**Course Name :** Digital Literacy  
**Course Code :** CSE0001  
**School Name :** SCAI  
**Branch :** CSE(CLOUD COMPUTING AND AUTOMATION)  
**Semester :** Winter Semester 2025-2026

## **REPORT**

### **Introduction**

This project was developed as part of the Digital Literacy course, where I took on the role of a Student Digital Ambassador. The aim of this assignment was to understand and apply essential digital skills required in today's academic and professional environment. Through five structured tasks, I explored different aspects of digital literacy, including online presence, safe communication, use of digital tools, and awareness of cyber threats. Each task helped me gain practical experience using platforms like GitHub, LinkedIn, and Google Forms. Overall, this project strengthened my understanding of responsible digital behaviour and prepared me for future academic and career opportunities.

### **Task 1: Digital Literacy Awareness Infographic**

For Task 1, I created a digital literacy awareness infographic using Canva. The infographic explained key concepts such as what digital literacy means, safe internet practices, and the importance of maintaining a professional online presence. I focused on using simple language, icons, and a clean layout to make the content easy to understand. One challenge I faced was selecting the most important points without overcrowding the design. This task helped me improve my visual communication skills and understand how design tools can be used to educate others effectively.

### **Task 2: Student Digital Portfolio**

In Task 2, I built my digital portfolio by creating and updating profiles on platforms like GitHub and LinkedIn. GitHub allows me to showcase my technical work and projects, while LinkedIn helps in building a professional network. I added my educational details and created a basic profile README on GitHub. This task helped me understand the importance of maintaining a professional digital identity. In the future, I plan to update these profiles regularly with my projects, skills, and achievements.

### **Task 3: Explore Coding & Collaboration Platforms**

In this task, I explored coding platforms and collaboration tools. I completed a beginner-level coding problem which helped me understand problem-solving and logical thinking. I also created a Google Form titled 'Digital Literacy Awareness Quiz' with multiple-choice and short-answer questions. This helped me learn how to collect and analyze data using Google Sheets. This task showed me how digital tools can be used effectively in both academic and collaborative environments.

### **Task 4: Professional Email & Etiquette Guide**

In Task 4, I learned about professional communication by drafting formal emails and creating a social media checklist. I understood that poorly written emails without proper subject lines or greetings can create confusion. By following proper email etiquette such as clear structure, respectful tone, and correct formatting, communication becomes more effective. This task improved my ability to communicate professionally and maintain a positive digital presence.

### **Task 5: Cybercrime Awareness Case Study & Prevention Guide**

In Task 5, I explored cybercrime awareness with a focus on UPI fraud. I learned that many users fall victim to scams due to a lack of awareness about payment requests. This task made me realize the importance of verifying transactions and never sharing sensitive information such as OTP or UPI PIN. I also created a prevention checklist to spread awareness. This task increased my understanding of online safety and encouraged me to adopt secure digital habits.

## **Conclusion**

Overall, this project provided me with a comprehensive understanding of digital literacy and its importance. It helped me build skills in communication, online safety, and professional presence. Each task contributed to my growth as a responsible digital user. This experience will be valuable in my academic journey and future career.
